AUTHOR INDEX TO VOLUME 3

Adeli, H., 3:227, 273
Alshawi, M., 3:191
Ardekani, S. A., 3:13
Argialas, D. P., 3:55

Bedard, C., 3:333
Bhatti, M. A., 3:111
Bird, S., 3:93

Cabrera, J. G., 3:191
Chompooming, K. V., 3:227

Fazio, P., 3:167, 333

Gori, R., 3:275
Gowri, K., 3:167, 333

Hamerslag, R., 3:81
Hamilton, G. B., 3:45
Han, D. L., 3:13
Harik, I. E., 3:245
Hobeika, A. G., 3:13

Jain, D., 3:321
Johnson, D., 3:173
Jones, P. C., 3:265
Juang, C. H., 3:157

Kangari, R., 3:345
Kirshenblatt, M., 3:45

Leung, A. Y. T., 3:127
Li, H.-L., 3:199
Lo, D., 3:145

Maher, M. L., 3:321
Manheim, M. L., 3:29
Marksjo, B., 3:93
Melosh, R. J., 3:289
Morrison, G., 3:265
Moselhi, O., 3:75

Narasimhan, R., 3:55
Nicholas, M. J., 3:75

Pietrzak, J., 3:127

Savory, E., 3:181
Schrefler, B. A., 3:275
Selvadurai, A. P. S., 3:257
Sfeir, D. R., 3:245
Sharpe, R., 3:93
Smolinski, P., 3:215
Spring, G., 3:299
Stiemer, S. F., 3:145
Swarts, J. C., 3:265
Sutcliffe, D. E., 3:257

Thomson, D., 3:93
Thomson, J., 3:93
Toy, N., 3:181

Utku, S., 3:289

Wang, C. K., 3:311
Williams, T. P., 3:345
Wong, S. C., 3:127

Yao, J. T. P., 3:1

Zhang, X. J., 3:1

SUBJECT INDEX TO VOLUME 3

Automation
of knowledge organization and acquisition, 3:1

Biaxial bending problem
in reinforced concrete by a three-level iteration procedure, solving, 3:311

CAD techniques
combining expert systems, 3:321
Cellular analogy
for the Saint-Venant torsion analysis of solid and hollow sections, 3:173
Computer support
to design, planning, and management, a general model, active, 3:29
Concrete pavements
an expert system to evaluate, 3:191
Construction operation
planning, a knowledge-based system, 3:345
Construction planning and control
expert system tools for, 3:75

Data acquisition system
for wind tunnel studies, microcomputer controlled probe traversing mechanism, 3:181
Decision support system
using fuzzy sets, development of, 3:157
Design
a general model for providing active computer support to, 3:29
Design code expert systems
extending prolog to provide better support, 3:93
Development tools
for processing design specifications, knowledge-based system, 3:321

Editorial, 3:273
Engineering design software
developing using HyperCard, 3:111
Expert system
and CAD techniques, combining, 3:321
to analyze hazardous intersections, 3:299
for evaluating multicriteria transportation networks, 3:199
to evaluate concrete pavements, 3:191
Expert system tools
for construction planning and control, 3:75

Fast buckling analysis
of statically indeterminate variable-section struts, 3:275
Finite element method
two-level, for thin plates subject to concentrated loads, 3:127
Fuzzy sets
development of a decision support system, using, 3:157

Hazardous intersections
expert system to analyze, 3:299
Heat conduction
unsteady, parallel mixed-time integration methods, 3:215
HyperCard
developing engineering design software, using, 3:111

Interactive optimization
of multispan plate girders, 3:227
Iteration procedure
three-level, solving the biaxial bending problem in reinforced concrete, 3:311

Knowledge-based system
for planning a construction operation, 3:345
Knowledge-based system development tools
for processing design specifications, 3:321
Knowledge organization and acquisition
automation of, 3:1

Logistics decisions
following urban disasters, 3:13

Management
a general model for providing active computer support to, 3:29
Microcomputer graphics
temperature and vapor pressure gradients across wall assemblies using, 3:167
Multispan plate girders
interactive optimization of, 3:227

Newmark's charts
computer adaption of, 3:257
Nonlinear spatial equilibrium algorithms
a computational comparison, 3:265

Parallel mixed-time integration methods
for unsteady heat conduction, 3:215
Planning
a general model for providing active computer support to, 3:29
Principal axes
of truss towers, determination of, 3:137
Probe traversing mechanism
and data acquisition system for wind tunnel studies, microcomputer-controlled, 3:181
Production system model
for terrain analysis knowledge representation, 3:55
Prolog
extending, to provide better support for design code expert systems, 3:93

Real time
vehicle systems monitoring, 3:45
Rectangular plates with variable rigidities
bending of, 3:245

Saint-Venant torsion analysis
of solid and hollow sections, a cellular analogy, 3:173
Solid and hollow sections
a cellular analogy for the Saint-Venant torsion analysis of, 3:173
Spreadsheets
formatted, for engineers, 3:145
Structural analysis
verification test for computer-aided, 3:289

Teacher-friendly transportation programs
3:81
Temperature and vapor pressure gradients
across wall assemblies using microcomputer graphics, 3:167
Terrain analysis knowledge representation
production analysis knowledge, 3:55
Thin plates
subject to concentrated loads, two level finite element method, 3:127
Transportation networks
multicriteria, an expert system for, 3:199
Transportation programs
teacher-friendly, 3:81
Truss towers
principal axes of, determination of, 3:137

Urban disasters
logistics disasters, following, 3:13

Vapor pressure gradients
and temperature, across wall assemblies using microcomputer graphics, 3:167
Variable-section struts
fast buckling analysis of statically indeterminate variable-section struts, 3:275
Vehicle systems monitoring
real time, 3:45

Wall assemblies
using microcomputer graphics, vapor and temperature pressure gradients across, 3:167
Wind tunnel studies
a microcomputer-controlled probe traversing mechanism and data acquisition system for, 3:181
